Experience

Software Engineer

Rapid Research

Sep 2022 - Present (8 months)

- Build and maintain a portfolio of high-quality web applications using React, Next.js, and Tailwind CSS to create responsive and visually appealing user interfaces.
- Develop and implement scalable back-end solutions using Node.JS and TypeScript to support the needs of various web applications, ensuring that they meet business requirements.
- Utilize Agile methodologies to ensure a continuous delivery of value, with regular deliveries of working software that met stakeholder needs, and continuously improve development processes.
- Maintain and optimize relational databases using MySQL and MongoDB to ensure high performance and reliability of applications, and proactively identify and solve potential database-related issues.
- Collaborate with cross-functional teams, including developers, designers, and product managers, to ensure seamless integration of front-end and back-end components and deliver high-quality software.
- Contribute to the development of cloud-based solutions using Linux, Git, and Docker environments to improve scalability, reliability, and automate the build, test, and deployment processes, and keep up-to-date with industry best practices.

Education

KCA University

Bachelor of Science - BS, Information Technology

Sep 2020 - 2023

Object Oriented Programming
Data Structures and Algorithms
Database Design and Development
Artificial Intelligence
System Design and Analysis
Android Development

Skills

TypeScript • React.js • Next.js • MySQL • Laravel • MongoDB • Django • PostgreSQL •
Node.js • Spring Boot
